Job Market Paper	<p>Decline in Entrepreneurship: A Tale of Two Types of Entrepreneurs</p> <p>Entrepreneurship in the U.S. has declined in recent decades. Using household survey data, I show that this decline is driven by the falling share of unincorporated self-employment (i.e., sole proprietorships and partnerships), while the share of incorporated self-employment (i.e., S and C corporations) has risen. This pattern is robust across demographic characteristics and data sources. To understand these trends, I build a general-equilibrium heterogeneous-agent model with occupational choices and two types of self-employment. Through counterfactual experiments, I evaluate two potential</p>

factors observed in the data over the same period: (i) an investment-specific technological change and (ii) the decline in tax progressivity. The results show that the main driver of declining entrepreneurship is technological change, whereas the decline in tax progressivity had a minor role.

Publications & Working Papers

The Limited Impact of Free College Policies, 2022

with Maria Marta Ferreyra, Carlos Garriga, and Juan David Martin-Ocampo. *R&R European Economic Review*

Cows Don't Give Milk: An Effort Model of College Graduation, 2022

with Maria Marta Ferreyra, Carlos Garriga, and Juan David Martin-Ocampo.

The Contribution of Short-Cycle Programs to Student Outcomes: Evidence from Colombia. 2022

with Lelys Dinarte-Diaz, Maria Marta Ferreyra and Tatiana Melguizo

Corruption and the "Paradox of Redistribution"

with Thomas Goda. *Social Indicators Research*. 140 (2018): 675-693.

Following Mexican Youth: A Short-Run Study of Time Use Decisions, 2016

with Juan Baron and Anna Popova. *World Bank Policy Research Working Paper 7534*

Presentations

AMMEEGO Conference, Georgetown University, May 2023
